Router2004-A9

BACnet Router   Product Model：Router2004-A9

    Functional description ： Router as an Ethernet routing, to achieve pass-through between the BACnet MS / TP and Ethernet BACnet IP.
    Application Fields： It applies to Johnson, Honeywell, Siemens, Delta, Schneider, and chinese domestic series of DDC, and Belimo, TROX valve controller MSTP bus integration. BA manufacturers can also achieve DDC equipment program upload and download functions.

    Runtime environment： Pure WEB conFigure uration, user operation is very convenient.

Hardware Parameter：

CPU：4 core 1.4 GHz	Power Supply：AC/DC 12~24V
Memory： 512M high performance memory	Size(L×W×H)：142mm×91mm×35mm (DIN Rail Mount)
System：LINUX	Weight：250g
Watts：8W	Material：Aluminum Cover
Interface：2 Ethernet 4 RS485	Setup：DIN Rail Mount
Flash：8G	Temperature：-20～70℃(working) -40～85℃(storage and transportation)
Network: 2 High-performance 100M/10M adaptive Industrial Network Card, support AUTO MDI/MDIX	Humidity: 20% ~ 90%, no condensation (work), 15% ~ 95%, no condensation (storage and transportation)
